Instructions and Sample Form:

Using the video file provided to you by ICS, please identify the type of event, (e.g., Mediasite), program title and date. On the form, 'TIME' refers to the timestamp on the video file. Use hours, minutes, and seconds (00:00:00) as needed. To "Cut" means that we will remove the video between the times you have indicated. To "Keep" means that we will leave that portion of the video in your final version.

Please provide the first few words of each segment to help us verify your points of time. Any other specific instruction you can provide is also helpful. Use only one form per event (a single form may have multiple pages) and be as precise as possible. Here is a sample for your reference.

Today's Date: March 1, 2011

Type of Event: Mediasite
